

North America 2011 Price List

Easy Royalties

- Contacts and distributors database
- Record sales figures for your own editions
- Maintains author contracts and royalty calculation rules; calculates author royalties due on sales of your own editions and generates royalty statements
- When used with That's Rights! for Rights Sellers, produces single author royalty statements combining sales & licensing activities
- Import/export from Microsoft Excel worksheets, Microsoft Access databases or other files

Single User Price List

Titles	Price
50	\$500.00 USD
100	\$800.00 USD
200	\$1,400.00 USD
400	\$2,600.00 USD
600	\$3,800.00 USD
800	\$5,000.00 USD
1,000	\$6,200.00 USD
1,500	\$8,000.00 USD
Unlimited Titles	\$10,000.00 USD

A title is all editions of a product that are listed on a single contract. You can link all of a title's editions (paper, cloth, eBook, audio, etc.) to a title if the quantity escalators for each edition are by product or contract.

Additional client licenses cost \$350 each. An unlimited user license costs \$2,340.

Additional Users	Additional Cost
1	\$350.00 USD
2	\$700.00 USD
3	\$1,050.00 USD
4	\$1,400.00 USD
5	\$1,750.00 USD
6	\$2,100.00 USD
Unlimited Users	\$2,340.00 USD

There is no charge for updates to your current version; going from version 3.10 to version 3.11. There is a charge to upgrade to a major new release, such as going from version 3.X.X to version 4.X.

Data Conversion (Optional)

The cost to convert one set of data; authors, titles, and royalty contracts, varies depending upon the quality, quantity and complexity of the source files. Please contact us for more information.

Hardware Requirements (single user version)

	Minimum	Recommended	Performance
Processor	Pentium III or later processor	Dual core processor or better	Quad core processor or better
Operating System:	Windows XP with Service Pack 2	Vista, Windows 7	Windows 7
RAM	1GB	4GB+	6GB+
Hard Drive Speed	5400 RPM	7200 RPM	7200 RPM+
Hard Drive Free Space	5GB	10GB	20GB
Screen	17" LCD	20" LCD	20" LCD

A faster processor, more RAM and a faster hard-drive will increase the speed at which royalty statements are generated. Publishers with 1000 to 2000 products should use the **recommended** hardware specifications. Publishers with 2000 or more products should use the **premium** hardware specifications for the workstation that generates royalty statements.

Support

Technical problems and errors in the software are addressed by Jeux de Couleur Ltd., the developers of EasyRoyalties; technical support is available via email and is free.

The North American distributor, Kensai International Ltd. provides 3 months of free support via email and phone from the date of purchase. Kensai also provides new users one-on-one online training sessions.

On-site training, implementation project management and software customization are available for an additional charge from Kensai International, Ltd.

Updates

Once you've purchased a license for Easy Royalties or That's Rights!, it's yours to use, indefinitely. There are no renewal fees, no maintenance fees or other extra costs.

Updates to the version you purchase are provided for free.

Upgrades

If we release a major new version, you can upgrade for an upgrade fee, or you can stay with your current version - the choice is yours. If a new version is released within six months of your initial software purchase you will receive the upgrade at no charge.

A one version upgrade is priced at 25% of the purchased version's price.

Also Available

That's Rights! for rights sellers

(\$3,200 single user, additional users \$1,800 each, unlimited user site license \$12,150)

- Contacts and customers database
- Repository of title information and bibliographic data
- Manages submissions to prospective rights buyers, keeps track of quotes and negotiations
- Manages license agreements, advances & fees, royalty statements and income; works with multiple currencies and exchange rates
- Manages co-editions; includes co-edition forecasting and pricing tools
- Maintains author contracts and royalty calculation rules; calculates author royalties due on licensing activities and generates royalty statements
- Comprehensive tracking and follow-up of submissions, licenses (signatures, advances paid, renewals, etc.), rights sold, rights available, royalty statements and payments, and more.
- Import/export from Microsoft Excel worksheets, Microsoft Access databases or other files
- Generates tip sheets, quick catalogues of selected titles, and a wide range of reports
- Generate invoices for license fees and advances, royalty payments due, co-edition purchase orders, etc.
- Multi-currency: invoice in any currency, record payments in any currency. Different exchange rates at time of invoice and on receipt of payment show exchange rate gains/losses.

Configurations

The Easy Royalties database may be located anywhere on your local area network (LAN).

For single users, the database may be located on the user's personal computer. For multiple users, the shared database is typically located on the network's fileserver.

In a multiple user environment a copy of the software is installed on each licensed user's PC. For remote access the software can be installed on a Windows Terminal Services server running Microsoft Windows Server 2003 SP1 or later operating system.

You can create and maintain multiple databases for training or testing purposes.
